Recent Transactions

RFM Analysis

Recency

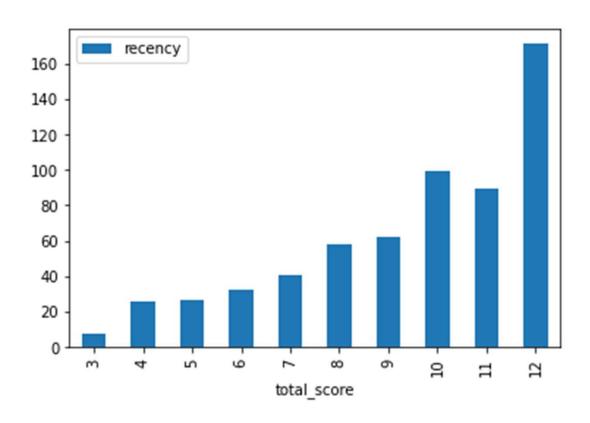

- ➤ The last day on which a customer performed a transaction was taken as the recency parameter.
- Customers were divided into 4 quartiles and given a R_Score.

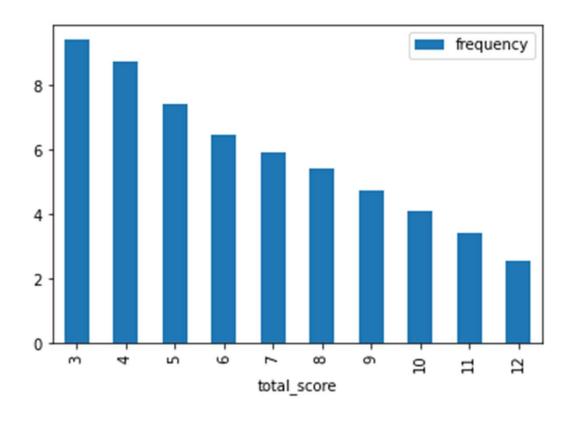

Frequency

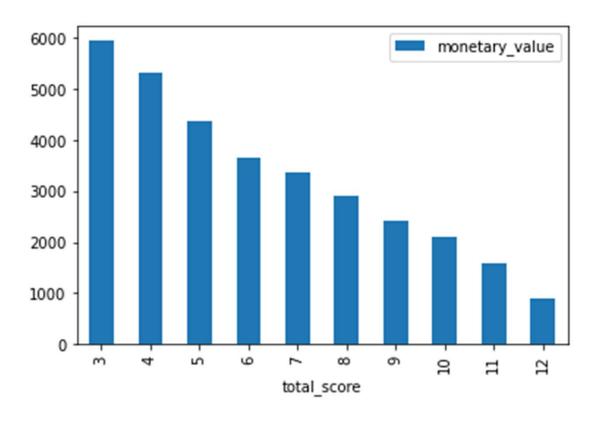

- ➤ The frequency of transactions done by a particular customer was taken as the frequency parameter.
- Customers were divided into 4 quartiles and given a F_Score.

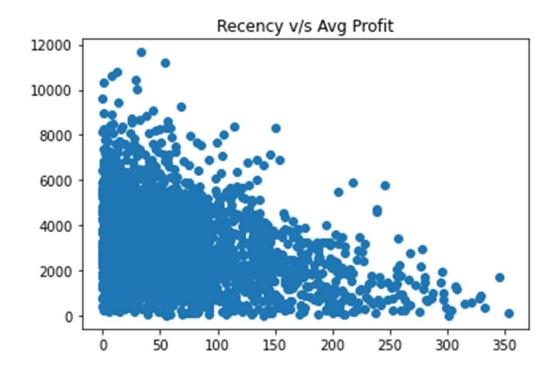

Monetary Value

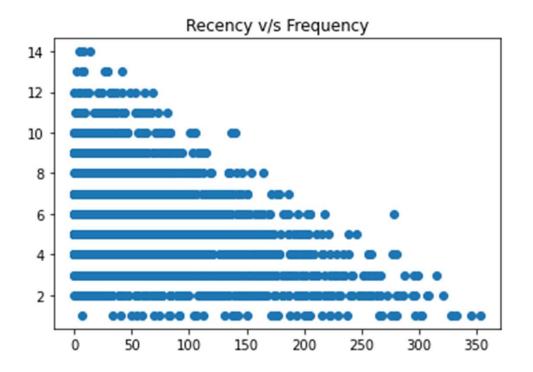

- The average profit per customer was taken as the monetary value parameter.
- Customers were divided into 4 quartiles and given a M_Score.

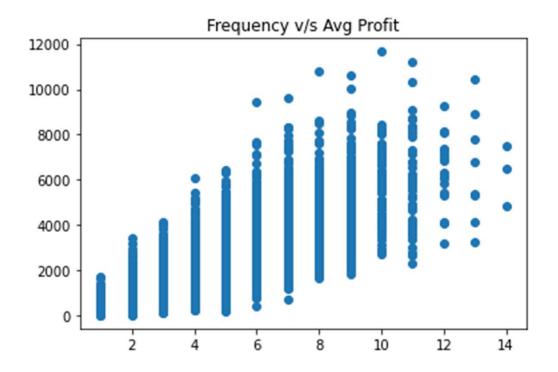

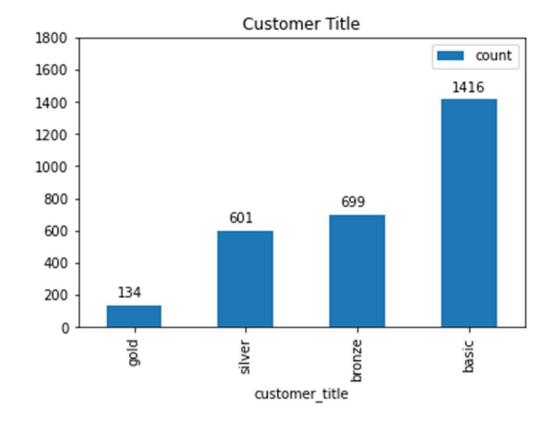

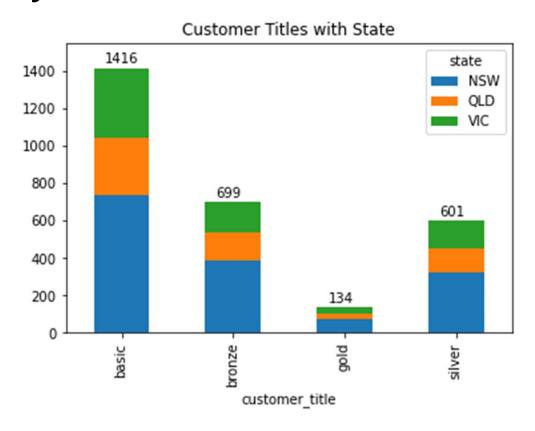

RFM Analysis

Based on the RFM Class, four customer tiers were identified:

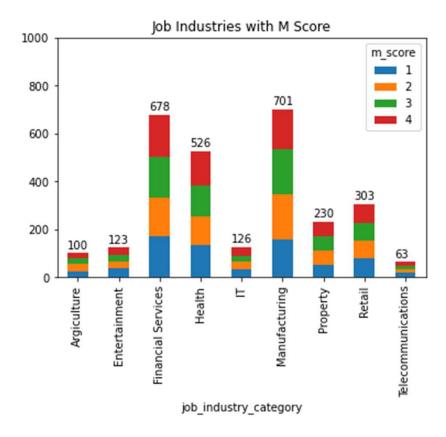

- 1. Gold Class: These customers have recently made a purchase, are frequent and are most profitable.
- 2. Silver Class
- 3. Bronze Class
- 4. Basic Class: These customers have not made any recent purchase, are not frequent and do not contribute majorly.

Customer Tiers by State

Profitable Job Industries

Customer Segments

Segment	RFM Score	Cumulative		
Platinum	3	134		
Very Loyal	4	296		
Becoming Loyal	5	558		
Recent	6	891		
Average	7	1300		
High Risk	8	1712		
Evasive	9	2110		
Losing	10	2417		
Inactive	11	2595		
Lost	12	2850		

Targeting Methodology

- Customers having high RFM Scores can be filtered and targeted.
- The customers have made recent purchases, are frequent, and drive the most profits.

Appendix

Appendix

S4. SELECTED DISTRIBUTION INDICATORS, Household net worth and gross household income—2011–12

		Household net worth(a)	Gross household income(a)
Ratio of values at top of selected percentiles			
P90/P10	ratio	53.87	9.06
P80/P20	ratio	11.61	4.45
P80/P50	ratio	2.36	1.90
P20/P50	ratio	0.20	0.43
Percentage share received by households in			
Lowest net worth quintile	%	0.9	12.1
Middle net worth quintile	%	12.0	17.4
Highest net worth quintile	%	60.8	31.3
Percentage share received by households in			
Lowest gross income quintile	%	12.4	4.3
Middle gross income quintile	%	16.4	15.7
Highest gross income quintile	%	36.8	46.5
